Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many decades of the past has been inclined to regard the scientist as hopelessly impracticable, a dreamer, a faddist. Within more recent years marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great universities of the world, and to Governments must be credited in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free writes: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources; yet the surprising fact is not only that these resources are unexploited, but that only a small fraction of them have been put to work. Not a tenth of the facts that scientists know are being used. The rest of them lie idle in the heads of professors or in the unread pages of scientific books."

Som years ago a gentleman named Dudley became a chief chemist of one of the large American railroads. He devised methods of testing coal and coke and lubricating oils, and saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He suited the available water supplies to the engines, and saved millions of boiler tubes from being burnt out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railroads have saved more money than all the railroad-wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potato industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, but if they piled it up anywhere the rain always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash—that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potato industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist built an electric apparatus which collects these poisonous particles out of the smelter smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches, in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the wealth of the whole irrigated region.

In Saskatchewan a clay-working industry was having trouble with its raw products. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust in wheat and other parasites, the removal of moisture from wheat without impairing its milling and baking qualities—these and other important subjects are receiving the attention of the scientists of Canada, and their solution will mean hundreds of millions of dollars to the farmers of the Dominion.

All of which only goes to demonstrate that every industrial interest in Canada, whether it be in the manufacturing class or in the work of production from the farm, the mine, the forest or the fisheries, should strongly support the present move for larger and more extensive research work in this Dominion. And of all classes, the farmer will probably prove to be the greatest gainer.

Alberta Crop Yield

It is estimated that the crop yield for the southern portion of Alberta will amount to 40,000,000 bushels. It has been estimated that the total yield for Alberta will be in the neighborhood of 200,000,000 bushels, but some officials say that 180,000,000 bushels will be the extent of the yield.

Little old grandpa thinks that he would ever come when the steering wheel would be the family circle.

Shampoo Yourself With Cuticura Soap

Anoint the scalp, especially spots of dandruff, with Cuticura Ointment. Then shampoo with a sud of Cuticura Soap and warm water. Rinse thoroughly. A healthy scalp usually means good hair.

Honor for Lost Fliers

Monument on French Coast Dedicated to Memory of Nungesser and Coli

A monument honoring the memory of Captain, Charles Nungesser, and Captain Francois Coli has been dedicated at Etretat, where the French airmen left the coast of France on their ill-fated attempt to fly to New York more than sixteen months ago. It bears the inscription:

"To the First Who Dared."
At the base of the column, which resembles an obelisk, are marble figures, three times life size, representing the two fliers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coli in their plane "White Bird" passed on May 8, 1927, before they disappeared in the west. On the front are engraved the words: "Nungesser and Coli, May, 1927." The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.Y., says: "With a feeling of malaise, I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got few boxes of them, and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak nervous person will be benefited by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Serve One Customer

Paris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently. At St. Moulay Henadai, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour, in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods, while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

"I wonder if that old fat girl is trying to flirt with me?"
"I don't know, but I can easily find out by asking her—she's my wife."

The Man With Asthma, almost long for death to end his suffering. He aches ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Death Of Sir Horace Darwin
Sir Horace Darwin, son of Charles R. Darwin, who wrote the "Origin of Species," died recently at Cambridge. Eng. Sir Horace, who was himself noted as a scientist, had been in failing health for some time. He had invented and constructed many delicate seismological and aeronautical instruments.

Transform Cadillac

For Railway Service

Canadian Pacific Uses High Power Sedan For Inspection Work

A high power Cadillac sedan specially equipped with flanged steel tired wheels has just been issued from the Angus shops of the Canadian Pacific Railway at Montreal for the use of the Engineering Department of the company. Capable of travelling on the rails at as great a speed as upon the road, the machine will be used for inspection trips on C.P.R. lines throughout the country. Service conditions are harder on the tracks for braking, and there are three systems on the car: the ordinary foot brake operating on the rear wheels, the conventional emergency brake, and a special supplementary brake applied by turning the steering wheel, acting through brake-shoes on the front wheels. The wheels have been changed, the front axle being rigid and more rugged, and the rear axle, instead of being mounted in conjunction with the differential, has had the differential removed and replaced by a one-piece alloy steel axle. This is driven by a single gear with a ratio of 4 to 1, in place of the ordinary differential ratio of 3 and ten eighths to 1.

The wheels themselves are of special design and are equipped with rubber insulation between the steel tyre and the wheel center in order to deaden shock at rail joints, switch points, diamonds and crossovers. The lighting system, moreover, has been supplemented to comply with railroad regulations.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improvised in other parts of Canada.

Drawback To Ocean Service

Airplanes Forced To Take Fuel For Entire Trip

Sir Eric Geddes, chairman of Imperial Airways, Ltd., states a scheme to establish an air service between England and India is now being organized, and it is hoped that within 18 months machines will be taking passengers from England to Karachi in five or six days.

On the subject of trans-Atlantic flight Sir Eric said an ocean service was not now commercially possible for whereas on the projected Canadian service the machines could be refueled at intervals, the trans-Atlantic flyer had to take all the necessary fuel with him.

A Household Medicine.—They that are acquainted with the clearing properties of Dr. Thomas' Eucalyptic Oil in the treatment of many ailments would not be without in its use. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an invaluable asset to the household. Keep it at hand, as the call for it may come most unexpectedly.

Entertained War Veterans

Belgium Honors Badly Wounded British Soldiers

Forty disabled British ex-soldiers were recently the guests of the British Disabled Soldiers' Association, Antwerp, who asked the British Legion to select a party of the most badly wounded men in Britain for a ten days' tour in Belgium as an indication of Belgium's admiration for, and gratitude to, the British Army.

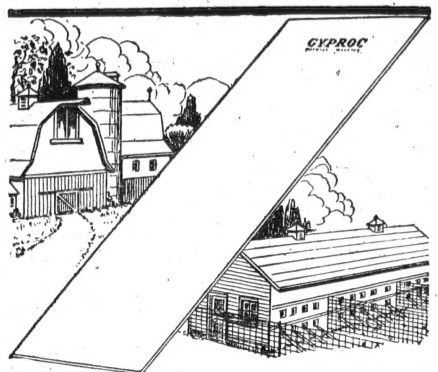

The whole of Belgium's official life was represented in this feting of British heroes, who were selected by the Legion irrespective of social standing or rank. Some were so badly disabled that the War Office had sent with the party a detachment of the R.A.M.C. to attend to them on the journey. Practically all the men had lost limbs.

Schwartz: "Vare les you working now?"
Krause: "I'm working in der zink mine."
Schwartz: "Der zinc mine?"
Krause: "Chess. Press one button and you come up—press another button and you zinc!"

We reckon it a kid could choose his own mother it wouldn't take him long to make the choice between one who could bake cookies and one who always knew what kind of bid to make when she had two five-card suits.

An anti-aircraft shell, thought to be live, was unearthed by workmen excavating the roadway at Queen's Gate, Kensington Gardens, in London.

Headache? Relieve With Minard's Liniment

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by GYPROC.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because GYPROC costs no more than products that have none of GYPROC's remarkable qualities.

GYPROC makes durable, permanent walls and ceilings in less time and at less cost. GYPROC Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabaster.

SEND FOR FREE BOOK
Canada Gypsum and Alabaster Limited,
Winnipeg, Canada.
Please send handsome free booklet, "Walls that Deflect Good Judgment," which contains valuable information on GYPROC for farm use.

GYPROC Advantages for Farm Buildings

Easy to use.

Low cost.

Workable as lumber.

Cannot warp, bulge, crack, shrink or burn.

Takes any decoration.

Resists heat and cold.

Vermis proof.

Eliminates repairs.

Protects your stock.

Ideal for lining garages, poultry houses, barns, stables and other farm buildings.

Especially suitable for converting attics and basements into extra rooms.

"EMPIRE" GYPROC Fireproof Wallboard

Radio May Control Street Cars
Radio experts prophesied a day when street cars and aeroplanes would be operated by distant radio control, following a demonstration at Chicago in which a surface car was operated by wireless from an automobile.

Ballplayer: "We gave the umpire fifty bucks to let us win the game."
Friend: "And still you lost?"
Player: "Yeah; the umpire was crooked."

A geographical mile is the length of one minute of latitude.

Humane Society Awards

The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Brooksby, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterloo Lakes, Alberta. Parchment certificates, Howard Mayers, White Rock, B.C.; Mary and Victoria Barrowman, Kaslo, B.C.; and W. H. Hepher, Powell, B.C.

Happiness and misery are the names of two extremes, the utmost bounds whereof we know not.

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin;
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer manufacture. While it is well known that Aspirin means Bayer manufacture, in some of the public action notices, the Tablets will be stamped with their "Bayer Cross" trademark.

N. M. Matheson Killed by Train

The people of the Irma community received a shock last Friday afternoon, October 12th, when they heard of the death of the "N. R. tracks" of Mr. Norman M. Matheson.

Mr. Matheson had gone to Wainwright and having missed the local train and had evidently tried to ride home on a freight and had fallen off on the Battle River bridge.

The funeral services were held in the United Church of Canada Monday afternoon, October 15th. The sermon was preached by Rev. Mr. Lindsay Wright, who by request took his text the XXIII Psalm, which he said presented to us God's care for his people set forth under two images that of a shepherd, and of a Host. Also by request he read Psalm XC and the choir led in the singing, "Abide With Me," "A Few More Years Shall Roll" and "Nearer My God to Thee." Messrs King, Tate and Schon sang, "Remember Me." Morris Wright played "The Dead March From Saul."

The I. O. O. F. had charge of the funeral and marched to the church accompanied by the Rebekahs. The burial service was read by Rev. Mr. Brooker, Presbyterian minister from Wainwright.

One sister of the deceased attended the funeral, Mrs. J. B. Vance of Sampson, Alta. Other relatives outside of Irma district were Mrs. G. S. Quart, of Macklin, Sask. Mr. and Mrs. S. Berreth, of Wainwright, and Mr. and Mrs. G. H. Berreth, cousins from Loughheed, Hardisty and Wainwright.

Flowers were from wife and children, Mr. and Mrs. G. S. Quart, Mr. and Mrs. S. Berreth, Mr. and Mrs. G. H. Berreth, Quart, Pietz and Oxnier, Ladies Aid and Woman's Missionary Society of the United Church, Irma Rebekah Lodge, Women's Institute, Board of Irma S. D. No. 2432, Councillors P. Jones, Jas Hedley, and Ross McFarland; teachers Mrs. McDowell and Miss Magrath; Mrs. J. C. Knutson and family; Mr. and Mrs. C. Hatch; Mr. and Mrs. W. Prickett; Mr. and Mrs. W. Masson; bouquets of roses from a friend unnamed.

The late Mr. Matheson was 45 years, 9 months of age. He was born in Ayr, Ont., January 12th, 1883, and took his senior leaving examination in the Ayr School. He afterwards learned the trade of a barber in his native village and worked at it for about fifteen years. He came west twenty two years ago and lived for a time in Gleichen, afterwards at Bow and came to Irma in 1910, from which time he has been secretary of the school and village and later assistant secretary of the Municipality. In 1911 he was married to Miss Sarah Berreth and to them were born six children, two of whom are deceased. His parents who are still living were members of the Presbyterian church. Besides his wife and his children, Berreth, Donald, James and Ina, he leaves to mourn his loss three sisters and six brothers.

Mr. Matheson loved music and flowers and was of a sociable temperament and consequently made a host of friends, which was attested to by his funeral being one of the largest ever held in the Irma district.

CARD OF THANKS.

We wish to thank the Odd Fellows for their kindness, in taking charge of the funeral of our beloved husband and father, and Mr. Wright, Mr. King, Mr. Tate and Mr. Schon. Also for the flowers, sympathy and kindness shown us in our bereavement.

Mrs. Matheson and family.

A RECORD ALBERTA HEN

A White Wyandotte hen belonging to Thomas Hill & Sons, Ponoka, has just completed a trap-nest record of 243 eggs in 305 days under government supervision. But more remarkable than the figure, which was beaten by another bird in this record, is the performance flock with 299 eggs to her credit, is the fact that the 243 eggs averaged 2.14 ounces, that she weighs seven pounds now and although a heavy producer, her type and plumage please the fanciers of the show birds. The owners refused \$75 dollars for her.

A careful observer remarks that when Cupid hits a mark he usually hits it.

WHEAT POOL NEWS NOTES

The Alberta Wheat Pool has made its final payment, this being 2.34c per bushel for wheat delivered to the 1927-28 Pool, except for a few minor grades. The total of this payment was \$1,955,693.58.

The Pool paid the following prices for wheat delivered from the 1927-28 Pool, except for a few minor grades: 1 Northern \$1.25 1-4; 2 Northern \$1.12 1-4; 2 Northern \$1.14 3-4; No. 5 \$1.01 1-4; No. 6, 92 3-4; Feed 85 1-4.

When the Wheat Pool distributed its second interim payment last July, 4c per bushel were retained to provide for elevator reserve, commercial reserve and administration cost. It was found last 3-12c per bushel were required for these purposes to the one half cent balance was included in the final payment along with the 2-14c per bushel received from the Central Selling Agency.

The administration costs during the past year were 9-20 of a cent a bushel. The elevator reserve deduction was 2c per bushel, and the commercial reserve was 1-1-20c.

The elevator reserve now totals approximately \$3,650,000. This money has been used to pay for over 300 elevators and the Alberta Pool's share of the terminal elevator at the Head of the Lakes. The commercial reserve now totals approximately \$1,750,000.

These reserve funds are required to develop the physical facilities of the Wheat Pool that the organization is extending very rapidly at the present time. An aggressive elevator building program is being carried out.

Each member is credited with his share of the elevator reserve and commercial reserve according to the number of bushels delivered. Interest at the rate of 6 per cent is paid to each member in cash. In this way a real asset is being built up for the growers and at the same time the organization is building up a comprehensive and modern elevator system.

The issuing of the final payment for the 1927 crop ends the business of the Wheat Pool's first five year contract period. During that time the Canadian Wheat Pool handled approximately 750,000,000 bushels of grain, with a turn over of one billion one hundred million dollars.

The Pools are entering the second contract period with a splendid membership, increased confidence and \$20,000,000 in physical assets. They are now handling the bulk of their own grain and are working steadily and surely on comprehensive plans to develop pool facilities all along the line.

In making this final payment the Alberta Wheat Pool issued 47,000 cheques. This required the labor of forty employees for three weeks. Before cheques are issued the ledger accounts have to be balanced in bushels and in dollars and cents. Then the cheques are issued and balanced. In this way the number of errors are at a minimum.

OIL AND GAS IN

WESTERN CANADA
A report by Dr. Hume and others on the oil and gas fields of western Canada has just been published by the Geological Survey.

The report gives detailed descriptions of the various oil and gas fields, of the geological formations exposed on the surface and encountered in drilling, and of the structural features of the strata. It also gives information regarding the results of boring operations and a discussion of the oil and possibilities. These descriptions are written by the members of the staff of the Geological Survey that have most intimate knowledge of the fields under consideration.

In an appendix appears a list of the wells drilled in western Canada with their exact location, their depth and the results obtained. Copies of the report may be had by applying to the Director, Geological Survey, Ottawa, Ont.

The trouble with the girls of today is that they would rather mend a fellow's ways than mend his socks.

CHURCH NOTICES AND ACTIVITIES

CHURCH NOTICES

Subject of Mr. Wright's address next Sunday evening will be "Religion and Emotionality."

Service, Sunday, October 21st
Strawberry Plains & 11 A.M.
Alma Mater — 3 P.M.
Irma — 7:30 P.M.

CHURCH SCHOOL 11 A.M.

Irma High School teacher, Mr. Reeds will give an illustrated talk on Temperance.

The Golden text for next Sunday is 2 Cor. 8:5; "They first gave their own selves to God."

The gift which most honors God is the gift of self — giving not only ourselves but also our talents. There is a story of an Italian boy who asked permission to take a trip on a boat which served as a floating hospital giving poor mothers and sick babies chance for sunshine and sea air. After he had played his violin, he passed around his hat but no one gave a penny. Angry, he complained of the "stingy people." The manager told him how poor they were, and that kind people were paying for their boat ride. The boy was poor but he decided others were poorer. Day by day he went down the harbor playing for the weary mothers ailing children, not would he take any money for his music and he was happy as a king as he gave himself to the work.

Six from the school attended the Viking Y. P. Conference, going Friday and returning Monday. Lawrence Nash took a car load of young men Saturday morning returning Sunday evening. Rev. Wright took a car load Saturday morning returning Sunday evening. All reporting a wonderful time. One said, he would have taken the trip for the Sunday night service alone. It was a happy outing and real inspiration.

Wanted

A trail ranger mentor for our teen age boys. One who can give one evening a week regularly to the boys. Volunteers please report at the United Manse.

ST. THERESA CATHOLIC CHURCH

Services Sunday, November 4th.
Mass at 11 A. M.

NEWS ITEMS FROM KINSELLA

Mr. and Mrs. D. Corbett spent Sunday and Monday at Edmonton.

Mrs. B. Wachter is spending a few days at Edmonton.

Mr. Jamieson of Edmonton has been spending a few days here and at Irma attending to the shipping of his cattle.

Mr. Frank Murray shipped a carload of cattle to Edmonton Monday night. Mr. Murray is spending a few days in Edmonton.

Miss L. Torgerson attended the conference which was held at Viking last week end, she being the delegate from here.

Mrs. T. Macky is at Irma this week helping to care for her mother, Mrs. Fred Thoresen. Her condition remains about the same.

Mrs. B. Wachter of the B. & B. gang which is stationed at Camrose at present spent the week-end at his home here.

Mr. Campbell of Viking is spending the week with Mr. and Mrs. R. Cormac.

The Anniversary Services were held in the United Church on Sunday last. Rev. Mr. Wilson, secretary of Missions from Edmonton, was the speaker.

The speaker delivered a splendid vocal solo by Miss Evelyn Corbett, also the quartette sang. Those in the quartette being Mr. and Mrs. Wangsness, Mrs. Allen and Mr. Kerns. Then on Monday evening a Chicken Supper was held in the Lee's Hall, there being a large attendance, several coming from Viking and Jarrold. After supper all went to the church where music was furnished by the Viking orchestra, and the quartette sang again at this time. Rev. Mr. Wilson gave a very interesting talk which all thoroughly enjoyed. The proceeds from the supper were \$63.00.

C.W.I. CONVENTION HELD AT CAMROSE

Mrs. J. W. Connelly, of Edmonton was returned to office as the diocesan president of the Catholic Women's League at the closing session of the convention held on Sunday afternoon at Camrose.

The other officers are Mrs. J. J. Knoll, Vermilion, first vice-president; Mrs. F. Moerke, Strome, second vice-president; Mrs. E. Wankel, Edmonton, third vice-president; Mrs. F. R. Munshaw, Edmonton, recording secretary; Miss Eva Dillon, Edmonton, corresponding secretary; Mrs. C. Sorenson, Edmonton, treasurer.

With 131 delegates and visitors registered the eighth annual convention was voted the most successful in the history of the diocese, 32 subdivisions with a membership of over 2,200 including 5 junior subdivisions were reported, and 25 voting delegates, including 4 juniors, were present.

Reports of district subdivisions showed marvellous achievement in even the smallest branches, and in the review of the work of the diocesan department of child welfare, Sisters of Service, St. Mary's home, study clubs, Good Shepherd home, diocesan library and other activities, good progress was noted.

Vernilion subdivision extended the invitation for the 1929 convention which was accepted.

Two outstanding social features of the convention were the drive and chicken dinner on Sunday at Duhamel and the closing banquet on Sunday night at the Hotel Alice, Camrose, when some 250 people attended.

The chief address at the closing function was "Character Building in the Home," by Rev. Father Cullen, Monsignor McGowan spoke briefly. The president of the Camrose district subdivision presided. The toast to the league was proposed by Mrs. J. Duggan, national president; the juniors, Miss Annie Fitzgerald, Edmonton; the clergy, Mrs. Kelly, three ladies, responded to by Rev. Father McNab; the press, Mrs. F. Moerke, Strome; our hostesses, Mrs. Edward Underwood, Edmonton; our guests, Miss Twombly, Camrose.

WEEKLY REVIEW PROV. MARKETS

BEEF—Edmonton reports light receipts the past week, with choice heavy steers bringing from \$9@9.50; choice light from \$9@9.50.

FEDBERS. STOCKERS—Feeder steers are making from \$7@8.50; stock heifers from \$5@5.75, and stock cows \$4.50@4.86.

HOGS—Edmonton reports thick smooths as selling at \$9.60, being off 10c for the week. Selects \$10.10.

POULTRY—Receipts are light. Active demand with orders hard to fill. Both local and outside trade. Quality ranges from fair to good. It is hoped that wintery weather will bring out more offerings.

EGGS—Receipts extremely light and storage stocks are handling bulk of trade, which is active. Prices up from 3c to 5c since last report, namely, extras, 37c; firsts, 35c, and seconds, 28c; small jobbers are quoting 45c for extras; 43c for firsts, and 30c for seconds.

HAY—Deliveries from country points are still difficult to obtain. Prices remain steady. Demand is not over-active, but it is expected to open out around the first of the year, when great activity is anticipated. Quality of stocks good and prices are holding steady.

FEED OATS—Demand active, but supplies scarce. A few offerings of new crop on market, which bring from 41c to 50c.

GREENFEED—Little movement and it looks like good stuff, bringing around \$11. per ton.

"You say your car turned turtle," remarked a local garage mechanic when called out to inspect a car by the owner, "Why it don't look as if it had turned over." "It didn't" the owner replied, "It just runs like a turtle."

First Provincial Joint Conference of Young Peoples Groups Held at Viking

The combined Canadian Girls in Training, Canadian Standard Efficiency Training Boys, and Young Peoples Societies Conference held in Viking over the past week-end was an unparalleled success. On Friday noon the delegates began arriving from West and East until there were some 160 representing nine local towns, Edmonton, Wainwright, Irma, Jarrold, Kin-sella, Viking, Holden, Daysland and Tofield as well as special leaders from further afield. This was the first Conference ever held in the Province, embodying the three groups and the leadership of the Religious Education Council of Alberta. The delegates included girls and boys from twelve to thirty years, and the following leaders: Rev. R. W. Hibbert, Miss Mabel Nix, and Mr. Gordon Lapp—Alberta Secretaries; Revs J. D. Woollett, N. W. Whitmore, M. L. Wright, A. O. McNeil, J. W. Bainbridge, R. H. MacPherson, and G. G. Pybus; Messrs. C. G. Purvis, B. Hilliker, W. H. Swift, John Farrell, Tom Haythornthwaite; Messdames J. D. Woollett, A. Wright, N. Luxton, C. G. Purvis, H. B. Collier, M. Barker, V. Runyon, L. Clement and Marion Cooper.

The Conference commenced with a Supper Party of leaders on Friday evening, Assignment of Bilets, and ending. This was followed by Registration of Officers. Mr. C. G. Purvis expressed a hearty welcome to the visiting delegates. Then a joint session addressed by Mr. Gordon Lapp gave an excellent preparation for the succeeding meetings.

Saturday's program commenced at 9 a.m. with a joint Service of Worship led by Rev. N. Whitmore. Then the delegates were divided into four groups and the remainder of the morning was spent in Problem and Program Discussions. In this session we got down to the real fundamentals of our young peoples work. The afternoon recreation including Basketball, noon was taken up with various kinds of Ball, Volleyball, and Athletic Badge tests. At 6 p.m. the United Church Hall was seated to capacity at a sumptuous banquet prepared by the Viking mothers. An excellent program followed the meal. Gordon Lapp excelled himself as Song Leader; then the respective groups gave their "Yells." W. H. Swift made a fine Chairman, and on behalf of the executive, welcomed the Conference to Viking. John Farrell spoke on "Camps and the Boys Parliament," and Tom Haythornthwaite told of his experience as a delegate to the Sunday School Convention at Los Angeles. Miss Mabel Nix captivated the audience with her stirring address on "To

Be Alive". Mrs. M. L. Wright expressed the appreciation of the delegates of the remarkable hospitality of the Viking people in making the Conference possible.

Sunday morning at 11 o'clock the United Church School had an attendance of more than 180—the delegates being divided into the various classes. At 3 P.M. a Joint Rally of C.G.I.T. and C.S.E.T. Boys, leaders, and parents was addressed by Miss Nix and Mr. Lapp, which brought this session of the Conference to a very suitable climax. At the same hour a Round Table Conference for those interested in Young Peoples Societies was held in the United Church Hall under the direction of Rev. R. W. Hibbert. In the evening the United Church Hall was overcrowded for the closing meeting. Rev. J. W. Bainbridge, assisted by Miss Nix and Mr. Lapp, led the worship, and Rev. R. W. Hibbert gave a very fascinating and inspiring address, on "World's Sunday School Convention at Los Angeles." The Church School orchestra led the music.

The delegates returned to their respective homes inspired and enthused, and determined to make the forthcoming season the most successful in connection with their group activities.

The Executive wishes to express its hearty appreciation to the Viking friends who opened their homes and in other ways assisted in entertaining the visiting delegates.

Bigger and Better Than Ever

The Ladies Aid of Irma United Church are putting on their annual Bazaar in Keiffer's Hall on Saturday October 27th. A good supply of hand work for sale. Fish pond for the week. Tea will be served afternoon and evening beginning at 3 o'clock. Everybody come.

THANKSGIVING DAY MONDAY, NOV. 12th

Thanksgiving Day will come this year on Monday, November 12th, which will also be observed as Armistice Day. The date has been announced at Ottawa as a Dominion holiday and will be gazetted in each of the provinces to make the observance uniform throughout Canada.

ANNOUNCEMENT

To My Friends and Customers:

I am moving to Hardisty for the winter but will continue to serve my customers in all parts of the district as in the past.

The Progress of Canada

Canada is forging steadily, even rapidly, to the front among the nations of the world. In all things material it is making great growth. Its trade, both domestic and foreign, is expanding as never before, and as a result every branch of industry is active. The country has just harvested one of the largest crops in its history, mining discoveries and operations are proceeding on an unprecedented scale, factories are working overtime, building operations in all provinces are reaching totals hitherto unrecorded, with the result that employment is general, wages good, and population increasing.

Important and gratifying as this material growth and prevailing prosperity is to our people, a much more vital matter to Canada is whether the Dominion is likewise making progress in those other directions which are essential to the upbuilding of a nation in the truest sense. Are the Canadian people becoming more of a nation of co-operators, meaning their success in terms of dollars and statistics recording economic development and growth, or are they utilizing the larger advantages and increased power which material prosperity is conferring upon them to encourage and develop those arts and characteristics which stamp a people as truly advancing to greatness?

We believe signs generally point to the fact that the people of Canada are, taken as a whole, more intensely interested today in the spiritual, intellectual, moral growth of their country than at any previous period; that, in fact, they are deeply concerned, and very determined that the national ideals and character shall be maintained at a high level.

The widespread interest in and discussion of the subject of immigration is but one manifestation of this spirit. Considered solely from a material standpoint it would probably pay Canada to enormously increase its population just as rapidly as possible. Economically Canada would probably gain by absorption by the United States. But Canadians are insistent that quality rather than quantity shall be the governing factor in our immigration policy, and it would be hard to muster a corporal's guard of outstanding men who favor the policy of United States annexation.

Throughout Canada increasingly sympathetic attention is being given to the assimilation of the non-British peoples within our borders into the Canadian family. Here and there people may adopt an unfriendly and unfair attitude towards these people, and to that extent retard the good work, but they are exceptions to the generality of Canadians. More and more it is being realized that these people are making a real contribution to the national life of Canada, bringing to us music, poetry, traditions and handicrafts which are enriching this Dominion.

The increased attention being given to musical festivals and symphony orchestras, to the establishment of art galleries and museums, to scientific research, to literature and the rapidly increasing number of libraries, and to the steady improvement in Canadian magazines and publications of a better class, all go to prove that the people of Canada are not wholly materially minded.

The wonderful success which has attended the application of co-operative principles in the solution of production and marketing problems, and in the provision of public services for the use of all the people, is having its inevitable effect upon the minds of all people. To an ever increasing extent they are beginning to realize that if through loyal co-operation they can remedy material evils and advance their individual and corporate welfare, through the acceptance of the same principles and their application to all phases of community, provincial and national life they can greatly advance the welfare of the country as a whole.

Co-operation is better than competition or antagonism. Sympathetic consideration and helpful co-operation is better than hatred and the maintenance of bitter enmities. In the practical work of co-operation the Canadian people are learning that there are two sides to almost every question, that people who may differ with you are just as sincere as you are, that the road to ultimate success and the greatest good to the greatest number lies along the path of friendly compromise rather than in continual enmity and warfare.

Canada's progress is, therefore, a well balanced progress, and because of this gratifying fact the people of the Dominion may look to the future of this very gratifying fact the people of the Dominion may look with unbounded confidence to the future if their great country.

A Railway Revolution

Train in England Electrifies Line as it Travels

A train which has puzzled many people has been running over a portion of the L.M.S. railway in England, says an article in "Answers". It looks like an electric train, and

To Aid Farm Workers

Clearing House to Furnish Winter Farm Employment May be Established

While no definite decision has been reached yet, a central clearing house, from which British miner-harvesters will be furnished winter employment may be located in Regina. The establishment of such a bureau, though not necessarily in this city, is expected to be the outcome of a conference held at the Parliament Buildings, Regina, on September 12, attended by representatives of the Federal and Provincial Departments of Colonization, those of the two great railways, the Government Labor Service and the United Farmers of Canada, Saskatchewan section.

RHEUMATIC MISERY

Relief Can Only Come Through Better Blood—Liniments of No Use.

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the inflamed joints swell and the patient becomes a cripple. Most treatments simply aim to keep down the pain, hence with every unfavorable condition a renewed attack follows.

To cast out rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can best be done through a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new richness and redness. Thousands have tried this treatment with beneficial results. That every sufferer from rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most hopeful means of recovery is shown by the statement of Mr. David Carroll, Picton, N.S., who says:—

"For years I was troubled with rheumatism. The pains were not continuous, but they always returned, and kept getting worse. I tried so-called electric belts and many medicines, but did not get more than temporary relief. Only those who have suffered from this trouble will realize what I suffered at times. I began to despair of getting better when a friend urged me to try Dr. Williams' Pink Pills. I bought a bottle and took the medicine helping me so I gladly continued taking the pills and soon found that every trace of the trouble had disappeared and there was great improvement in my general health. It is now two years since I suffered from this trouble and I have not had the least twinge of the trouble in that time. That is why I confidently recommend the pills to every sufferer."

You can get these pills from any medicine dealer or by mail at 50¢ a bottle. The Dr. Williams' Medicine Company, Brockville, Ont.

Kritik—Do you think you've improved "Richard III" much by rewriting it?

Placidity—Sure. It was way out of date. It's instance, where Richard hollers, "A horse! A horse! My kingdom for a horse!" I have him shout, "A plane! A plane! My dictatorship for a plane!"

The Poor Man's Friend—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Twenty years ago half of the population of 200,000,000 women and girls in China had crippled feet, but today almost every village has a women's shoe store which displays an attractive array of footwear.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

If a huge clister, large enough to cover Trafalgar Square and as high as Nelson's column, were built as a water-tank, London would empty it twice daily.

CUTICURA HEALS SKIN TROUBLE

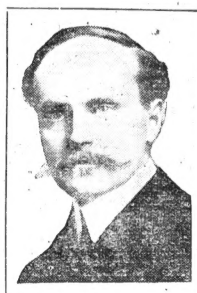

Sore Eruptions Broke Out Over Face, Itched and Burned:

"My trouble began with little, sore eruptions which broke out all over my face. They itched and burned so that I always wanted to be scratched, and when I scratched they got larger and then dried up. Some nights I could not sleep very well."

"I tried other remedies but they did not help me. I had the trouble over five weeks when I began using Cuticura Soap and Ointment, and in two weeks I was healed." (Signed) George W. Herchuk, Box 55, Chipman, Alta., Oct. 8, 1927.

Daily use of Cuticura Soap, with touches of Cuticura Ointment as required, keeps the skin fresh, smooth and clear. Cuticura Talcum is an ideal toilet powder.

Sample Free by Mail. Address: Canadian Agents, The J. C. F. Co., 225, St. Paul Street, Montreal 26, Que. Cuticura Shaving Stick 25¢.

BEAUDRY LEMAN, General Manager Banque Canadienne Nationale.

Director Shawinigan Water and Power company; Montreal Tramways company, and Asbestos corporation. Born, Montreal, Jan. 2, 1878, son of Dr. Joseph Beaudry Leman. Educated Mount St. Louis College, private tutor, University of Lille, France. McGill University, Quebec, May 12, 1906. Has three sons and two daughters. Address 557 St. Catherine Road, Outremont, Quebec.

Junior League of British Nations

Proposal to Form Branch of British Empire Parliamentary Association

"To the British Empire, at least, it would be a real junior league of British nations," stated M. A. MacPherson, M.J.A. for the Regina constituency, when speaking of the proposal of the government of Saskatchewan to consider the advisability of forming a branch of the British Empire Parliamentary association.

The Regina member further expressed his opinion that such an organization, having as it does, the aim of trying to bring the different nations and colonies of the British Empire into closer understanding and contact with each other, would most certainly be a splendid one for the province to adopt.

It is proposed that at the next sessions of the legislatures of the four provinces of Ontario, Saskatchewan, Alberta and Manitoba, this scheme be presented to the members of the respective assemblies and with their approval, the work of organizing such an association be definitely undertaken.

The Oil for the Farmer—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Canadian Amateur Golf Championship

Will Be Held at Jasper Park Lodge Next Year From August 19 to 24

Authentic information was received at Jasper National Park by the visiting Senior Golfers from Great Britain that the United States National Amateur golf tournament will be held next year over Pebbles Beach, Calif., from September 2 to 7. With these dates now definitely assured it is also possible to state positively that the Canadian Amateur championships will be held over the Jasper Park Lodge golf course next year from August 19 to 24. The defining of these two important dates in the golfing program for 1929 leaves an interval of a full week between the Canadian and U. S. Amateur events and it is more than likely, therefore, that the Canadian championships will attract a large number from the gallery of stars in the United States and other countries who will be westward bound for the U. S. event. Should these hopes be fulfilled, and every effort is to be made by the Royal Canadian Golf Association and the Canadian National Railways to bring them to fruition, the 1929 Canadian Amateur championship will be the greatest event in the history of golf in Canada.

Tomatoe Dealer (after several futile suggestions): How would just a simple "Gone Home" do for an inscription?

The Widow: I guess that will be all right. It was always the last place he ever thought of going.

Speaking of serious reading, how is this from the bank, "Your account is overdrawn."

How French Police Work

Use Soundless Whistles to Give Alarm to Headquarters

Police in most of the large French towns can summon help without being heard. They are supplied with whistles whose notes are far too high-pitched for the human ear to detect. These inaudible sound waves are picked up by microphones skillfully camouflaged throughout the city, and an alarm is flashed to central police headquarters.

A policeman who sees a burglar at work can summon reinforcements without alarming the suspect. He can, too, direct the sending of aid in Morse code by using the soundless whistle.

Good-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

What would really have settled the whole thing is for Mr. Kellogg to have written into his peace pact that no nation engaged in war could borrow money of the United States.

A torch has been devised that can cut steel in a sunken ship at any depth.

Becoming Great Industry

Tourist Trade Is Not Far Behind Wheat Exports

The Federal bulletin, Natural Resources, puts in a graphic way the importance of what it describes as "a new giant of Canadian business," being the second among five. These are Canada's wheat exports, valued last year at \$399,624,000, expenditure of tourists from abroad estimated at \$275,000,000; mineral production, \$245,520,000; pulp and paper mills, \$219,328,000, and building permits, \$184,613,000. A few more years and our tourist trade will be our greatest asset!

Mrs. Littleleaf—Tilly, you've left my lingerie scattered all around this room and I'm expecting company any minute.

Tilly, the Maid—That's all right, ma'am, I'll keep my eye on 'em and see they don't pinch nothin'.

The House of Lords, England, may transact certain business when there are only three members present, not necessarily including the Lord Chancellor.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Woodpeckers and literary critics make their living by picking holes in things.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it isn't! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be adapted with their "Bayer Cross" trademark.

Diamond Jubilee Committee Issues Official Commemorative Medal of Beautiful Design

One of the final tasks of the National Diamond Jubilee Committee, which arranged the celebration last year of the Sixtieth Anniversary of Confederation, has been the preparation of an official commemorative medal. The records of 1867 showed that the government of Sir John A. Macdonald issued a medal commemorating the confederation of the provinces. This medal, which was designed and struck in England, showed on the obverse the effigy of Queen Victoria and on the reverse a group of five figures symbolizing the handing by Britain to the four original provinces of the pact of confederation. In designing a medal commemorating the Diamond Jubilee, the National Committee decided to show on the obverse an effigy of His Majesty King George V. and on the reverse a single figure which would in some measure represent the spirit of unity and strength which has been developed in Canada during

those of Cook and Vancouver. The whole is surmounted with the Latin motto from the Canadian coat-of-arms, "A mari usque ad mare."

The National Committee is happy to acknowledge the splendid co-operation of the London and Paris mints in the production of the original dies of this medal. The dies arrived in Canada early in August and the work of striking the medal is proceeding at the Royal Mint in Ottawa. The medal is three inches in diameter, one of the largest ever handled by the Ottawa Mint. All the metal used is from Canadian mines and the medal is thus a happy combination of British, French and Canadian artistic and technical effort.

The committee has ordered gold medals to be struck for His Majesty the King, for His Excellency the Governor-General of Canada and for the Prime Minister of Canada. Gold medals will also be presented to

the last sixty years. A number of medals in working out its idea and a Canadian artist assisted the design of Mr. C. W. Jeffreys of Toronto was finally adopted as expressing most accurately the views of the committee. The general idea conveyed by this design was afterwards translated in his own original work into medallion art by the eminent sculptor and engraver, Mr. Raymond Delamarre, of Paris, France.

Illustrations of the medal reproduced herewith show a new effigy of His Majesty King George V., which is the work of one of the foremost British artists, Sir Bertram Macken- na. The reverse shows a figure which admirably typifies the qualities of youth, energy and confidence in the future. By its position, facing the Atlantic, from which blows a strong invigorating breeze, there is a suggestion of the cultural origins of our people and of the ideals of liberty and justice inherited from overseas. The figure stands on a pedestal bearing the dates 1867-1927. Surrounding the pedestal are sheaves of wheat and wreaths of maple leaves and in the background a map of Canada, in the upper part of which the shield from the Canadian coat-of-arms appears. On the Atlantic side of the map are the names of the first discoverers, Cartier and Champlain, and on the Pacific side

H.R.H. the Prince of Wales and to the Rt. Hon. Stanley Baldwin, Prime Minister of Great Britain, who paid a special visit to Canada in connection with the Jubilee ceremonies last year. A gold medal will also be deposited in the Dominion Archives. Silver medals will be struck for His Excellency the Viscountess Willingdon and for H.R.H. Prince George, who accompanied the Prince of Wales on his visit last year, for members of the Privy Council of Canada, the Lieutenant-Governors of the provinces and the Prime Ministers of the provinces. Bronze medals will be presented to senators and members of the House of Commons to members of the provincial governments, to the surviving sons and daughters of the Fathers of Confederation, to members of the National Diamond Jubilee Committee and to officers of the Provincial Diamond Jubilee Committees. The medals are being struck as rapidly as possible at the Royal Mint and it is hoped that the distribution will be completed before the end of the present year.

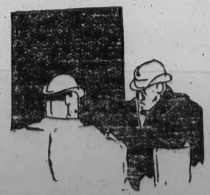

The Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, took advantage of his trip to Europe in connection with the signing of the Kellogg treaty to present gold medals to His Majesty the King, H.R.H. the Prince of Wales and the Rt. Hon. Stanley Baldwin.

Manitoba Fisheries

Organization Meeting Held To Place Industry On A Firm Footing

At a meeting of the Manitoba Co-operative Fisheries Limited, attended by more than 100 representative fishermen from Lakes Winnipeg, Manitoba and Winnipegosis, plans were completed to place the industry on a basis where the fishermen will share to a greater extent in profits made in the business. Suggestions were made to appoint agents at Chicago and New York. Last year Manitoba produced 18,000,000 pounds of fish and those who belonged to the organization were responsible for a catch of about 7,000,000 pounds.

Among the curious regimental pets belonging to units of the British Army at different times have been a chimpanzee, an ape, a lion, a seal, a cheetah, a black bear, and a lamb.

"I read your remarkable article. In fact, I read it three times." "You flatter me!" "Not at all. Even now I don't understand it."—Pele Mele, Paris.

Distinguished Farmers

Wheat Pool Includes Amongst Its Members A Prince, Baron, Duke and Countess

The Alberta Wheat Pool now includes among its members a prince, a baron, a duke and a countess. They have between them a signed-up acreage of 10,000 acres, it was stated at the offices of the pool in Calgary.

These distinguished members are His Royal Highness, the Prince of Wales, Baron Rodney, the Duke of Sutherland, and the Countess de Poras. The latter, who has a farm at High River, has just signed up a contract for 350 acres with the pool.

Human Power Plant

Psychologists Claim To Have Heard Messages From Nerves In Body

Human life has been revealed as a wonderful electric power plant and system of transmission lines.

Two experimenters in psychology say they have listened to messages flashed over the network of nerves in the human body, translating the impulses of nerve currents into sound waves that human ears can hear.

Impulses are detected by electrodes attached to the body. These nerve messages, magnified eight hundred times by a powerful amplifier, can be broadcast by wireless.

Valley of a Thousand Falls

The name, Valley of a Thousand Falls, in the Mount Robson District British Columbia, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman and participated in his attempt to climb Mount Robson.

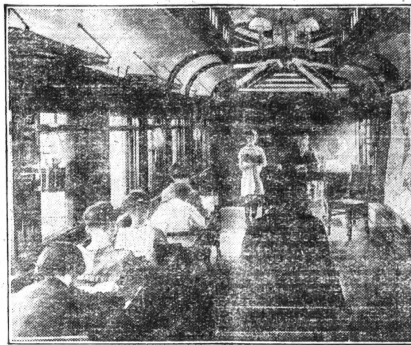

Another Classroom on Wheels Appears

Education in these days is hard put to it to keep pace with civilization although the one is dependent upon the other. In the more remote districts of Canada, in particular, the cause of culture has a struggle to survive, and were it not for modern methods the rising generation in many parts would remain untaught.

Although agricultural communities enjoy the most modern educational facilities and the "little red school house" has assumed an increased importance and has considerably en-

Co-operating with the Ontario Department of Education, the Canadian Pacific Railway has evolved the school car, and late this summer issued from its Angus Shops the second and especially prepared coach for this unique purpose. It is now operating in the district in Ontario lying to the west of Fort William and Port Arthur, while its predecessor is carrying on its duties as it has for some time past in Northern Ontario in the neighborhood of Cartier and Chapleau.

The school car is equipped in every

larged its scope, other districts suffer by necessity from neglect. Outlying areas with a scattered population find inter-communication at best in summer time under the most favorable conditions difficult enough, but when winter closes down a partial paralysis is brought about. Such localities could not afford school facilities nor could permanent schools adequately serve the community, for during the winter season children could not travel with safety. This problem, which for a number of years remained unsolved, has been met at last by a singularly practical and effective remedy, the "school car."

way like the most up-to-date "little red schoolhouse," having a bright classroom with blackboard, regulation desks, maps, globe, school-books and so forth; a library of books for the students and adult visitors as well; and comfortable living quarters for the teacher. From the outside its appearance is that of a standard first class coach, but inside it has been entirely remodelled and especially protected and equipped to withstand the rigors of the coldest weather when left on a lonely siding.

The mobile schoolhouse solves in a unique fashion a vital and hitherto unsolvable educational problem.

Permanent Link With World

Residents of Pitcairn Island To Receive Radio Transmitting Set

Isolated since birth, except when some friendly or storm-buffed vessel comes to visit them, the islanders of the small Pitcairn Islands will soon be able to talk with the world, for a Marconi wireless transmitter which has been presented to the islanders by the Marconi International Marine Communication Company, is now on its way out there and, when installed, will be a permanent link with the outside world.

Pitcairn Island lies in the mid-eastern Pacific Ocean, and was sighted by many sailing ships in the old days. Unlike the majority of coral reefs, but rises abruptly with steep and rugged cliffs of basaltic lava.

Recently a small group of islanders learned the Morse Code, picking it up from books that had been given to them by the Marconi operators on the ships that called at the island. In 1921 they obtained a simple crystal set and five years later received a Marconi type 31 ship's crystal receiving set, but on each they can only receive.

British Settlers For B.C.

Block System of Settlement Is Advocated By Premier

Premier S. F. Tolmie informed the Empire Parliamentary Association delegates and members of the Vancouver board of trade that the provincial government was prepared at any time to enter into negotiations for the placing of British born settlers on British Columbia lands.

"British Columbia was prepared to supply the land, administration, supervision, schools, roads, and her investment in railways," Hon. Dr. Tolmie stated.

The block system of settlement was advocated by the premier and he believed preliminary training could be given settlers in clearing settlement lands.

During the conference the feasibility of settlers going to the land in the Peace River district was discussed, but the settlement scheme embraced various sections of British Columbia.

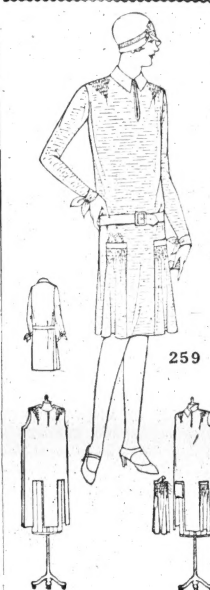

Brandon's Broadcasting Station

Brandon's first broadcasting station has just gone into daily use, and a studio will give grain and stock reports each day, and once a week, in the evening, will broadcast local concert programmes.

The main supply of rubber comes from hevea trees of the tropics.

Mining Possibilities of Northern Manitoba and Saskatchewan Attracting Great Attention

Winnipeg Newspaper Union

Parisian Simplicity

A slender one-piece dress achieves distinction through shirring, which gives a slightly fitting appearance at shoulders, and forms pockets at each side of front of skirt and adds flare to hemline. It is a youthful type that is becoming to most figures, and so entirely wearable and smart in materialized cashmere. Wool jersey, plain or printed, silk crepe, crepe satin, canton crepe, georgette crepe and sheer velvet, also adaptable. Style No. 259 is designed in sizes 16, 18 and 20 years, 36, 38, 40 and 42 inches bust. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Postman: "As soon as I saw you come round the bend I said to myself, 'Forty-five at least.'"

Lady Driver: "How dare you! It's this hat that ages me."

Nine in a Line

The distinction of being the point in the British Empire from which the largest number of bushels of grain are shipped direct from farm to rolling stock belongs to Vulcan, Alberta, on the lines of the Canadian Pacific Railway. Here is a view of the local elevators, nine all told, seven of which are of double capacity. Last year Vulcan shipped two and a quarter million bushels of grain, and indications are that it will exceed its own record this year.

The year 1928 will undoubtedly be a record one in the history of Canadian mining. The search for mineral deposits has been unequalled both for its intensiveness and for its breadth of activity. Never in any one year has so much money been spent in exploration as will have been spent this year. The operations are Dominion-wide but by far the most important are those that are directed to areas underlain by the Precambrian rocks of the northern parts of the provinces of Quebec, Ontario, Manitoba, and Saskatchewan, and of the Northwest Territories.

The most spectacular explorations are those that are headed into the more remote parts of the country east and west of Hudson Bay. When it was learned last winter that transportation to Flin Flong was to be provided, that that large ore-body was finally to be exploited, and that other large ore-bodies in northern Manitoba had been discovered, the Department of Mines, at Ottawa, was flooded with requests for information regarding that part of the country. Then interest broadened and the possibilities of more remote areas were considered. It was felt that the completion of the Hudson Bay Railway to Churchill and the increase of boat transportation on the bay would render accessible a great stretch of country that had hitherto been regarded as Canada's hinterland. Then came the desire to be on the ground early and secure the best. The result is that a great many prospecting parties have left for these northern areas. The exploratory work is entrusted to hardy men of experience and knowledge. Some prospectors have gone to Hudson Bay by way of northern Ontario and northern Manitoba, others have left by boat from points on the Atlantic coast. One company alone has sent by boat ten parties of two men each and the necessary supplies. These will be assisted and directed by men sent in by aeroplane.

In the more readily accessible areas and in areas where transportation facilities are of the best, search for more mineral deposits is being prosecuted with feverish intensity. This takes the form of surface prospecting and of underground testing by diamond drilling, shaft sinking, and drifting. All this exploratory work has been given a powerful impetus by the discoveries centering on the northern part of the Manitoba-Saskatchewan boundary, the Rouyn area of western Quebec, and the Sudbury, Patricia, and other areas of Ontario, and it is expected that by the close of the year a very important addition will be made to the known and developed mineral reserves of the country.

To Study Ancient Designs

The National Museum, Ottawa, will conduct a study of the ancient handicrafts and designs of French Canada, in order to determine the extent of their influence on the arts and crafts of the various Indian tribes. It is thought that many, if not most of the patterns in bead and silk work that appear on Indian specimens may not be as original as all at all but copied from European patterns.

Tourists Aid Development

The tourist is often the fore-runner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

That young Canadian sprinter from the West coast astonished the world. To beat the West in anything a fellow has to be speedy.

"The drunken driver must go," says a newspaper heading. That's just the trouble. He always does go.

Young Lady: "Your novel has a charming ending."

"What do you think of the opening chapters?" "I have not got to them yet."—Lustige Kölner Zeitung, Cologne.

LOCAL EVENTS IN OTHER TOWNS

Mr. Bennett in his Edmonton address confined himself almost entirely to one theme. It was the need of making Canada an economically independent nation and is enlarging its industrial opportunities. He had spoken along these lines in the east and had been challenged to take the same position when he came west. But those who knew well the man and his methods never for a moment believed that he would alter his message according to the part of the Dominion in which he happened to be. This has been done altogether too frequently in our politics and there is no excuse for it. — Edmonton Journal.

One of our readers reminded us recently that grain fields swell up a lot in the spring and shrink in the fall. In seeding time a field will measure 100 acres strong, but in the fall when threshing is being done and the yield per acre is being figured out the same field will contain a scant 75 acres. — Consort Enterprise.

Purchase of Lyric hall by Bashaw Lodge No. 175, B.P.O.E. was completed on Saturday last when the Local Elks took over the hall from Robert Cammidge the price paid being \$2,000. — Bashaw Star.

Mr. A. Dupre who finished his new garage last year is building an addition to it for the storage of cars as his business has grown so fast that he had to have the additional space. — Wainwright Star.

Arrangements have now been completed for the taking of a local option vote in the Round Hill district on November 3rd. Chas Walker has been appointed returning officer. While the total voting strength of the village of Round Hill would ordinarily be small, advantage has been taken of certain changes in the act to enlarge the territory involved in the plebiscite and it is anticipated that some three hundred votes will be polled. The vote centres on the question of "beer or no beer." — Camrose Canadian.

Representatives of the Elks of Vegreville, Vermilion and Lloydminster met at Vermilion recently and discussed the hockey outlook. In all three towns the Elks handled the clubs in 1927-28 with fair success. Vegreville being the only point to come out with a deficit. But the league was quite a success all round and gave fans the best brand of hockey any of the towns have yet witnessed. — Vegreville Observer.

HUNTING SEASON BRINGS FIRE TROUBLE

Six thousand Canadian fire rangers have appealed through the Canadian Forestry Association for active co-operation this Fall in their effort to stamp out forest fire losses which in the past heedless hunters have occasioned. The official records show that Canada's most disastrous forest fires have occurred during the Fall season. So far this year forest rangers have taken advantage of a favorable season to make their services more effective by working constantly on the building of trails, lookouts, etc. The veteran ranger takes the best of pride in his own individual forest which he may have stood guard and fought to protect for 15 years or more. In face of the Fall hazard from hunters the following simple rules are suggested.

Matches

Be sure your match is out before you throw your matches away. Matches have heads, but they can't think. Do it for them. Break your match before you drop it.

Tobacco

Don't throw glowing tobacco from a car into the inflammable material by the roadside. If you simply must get rid of these, it is less dangerous to drop them in the centre of the road.

Making Camp

Build a small camp-fire. Build it in the open, not against a tree or log. Scrape away the debris from all around it.

Never build bonfires in windy weather or where there is the slightest danger of their escaping from control. Don't make them larger than you need.

Fighting Fires

If you notice a small fire, starting, try to put it out. Larger fires should be reported immediately.

From a vacation letter in the Chicago Tribune:
Little bankroll, ere we part,
Let me hug you to my heart.
All the year I've clung to you,
I've been faithful, you've been true.
Little bankroll, in a day
You add I will start away
To a gay and festive spot—
I'll come home, but you will not.

The Alberta Oil Gazette
H. W. LOVE, Prop.

A Good Advertising Medium and a
Reliable Newspaper on Oil Activities

The huge Graf Zeppelin, the German airship, arrived in the United States after a stormy trip over the Atlantic of some hundred hours. The captain stated that he was pleased with the performance of the big ship under trying circumstances and that it came safely through the rigid test. That this mode of travel will some day supersede the ocean liners is not a remote possibility.

The local merchants are ready for the fall trade with the largest and most assorted stocks it has been our pleasure to look over in years. The goods have evidently been very carefully selected and are right-up-to-the-minute. There is a large variety in every line and prospective buyers are assured of getting what they require.

The annual crop of weather prophets are now consulting the gods, watching the muskrat houses, throwing dead cats over their left shoulders, and announcing to the world that there's going to be some cold weather this winter. The trouble is their prognostications never fail.

Slot machines in cafes, cigar stands and confectioneries will be banned in Edmonton following the decision handed down by Magistrate P. C. H. Primrose when he fined Clifford E. Walker, owner of two slot machines seized in the Olympic Cafe, the sum of \$150 and costs with the option of three months in jail.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

Premier Howard Ferguson of Ontario, Mayor McBride of Toronto, Mr. Howard Stutchbury, Trade Commissioner for Alberta, and other dignitaries paid a special visit to the General Steel Works market at the Canadian National Exhibition, Toronto, where the practicability of burning Alberta coal was strikingly demonstrated in a McClary Sunshine Warm Air Furnace, and a McClary Eighty Range. The remarkable heating qualities of Alberta coal as demonstrated at this booth during the Toronto Exhibition amazed tens of thousands of people, and will undoubtedly lead to a big increase in coal orders from Ontario in the future.

Viking

Miss Phyllis Collier, who was home over the week end and was receiving congratulations from her friends on having won the Provincial W.C.T.U. Essay Contest. This contest provides two prizes for Public Schools and two for High. It is a matter for community pride that last year Miss Fernie Alexander, a pupil of V.H.S. won the prize for grades 9 and 10, and this year, another pupil of V.H.S. in grade 11 won provincial honors, including those of grade 12. The topic of the essay was "The Value of Total Abstinence on Health and Character."

The cheque arrived while Phyllis was home and was a complete and happy surprise as no other announcement had preceded it.

Harvest Festival Services were held at Rodino Sunday, October 14th. The school was beautifully and tastefully decorated by the ladies of the district. The Rector preached at each service to crowded congregations. The music was beautifully rendered by a Choir of trained voices. The Rector, Rev. A. Loydall-Bee preached at all services. After evening song a reception was held at the home of Mrs. Daniell at the home of Mrs. Rayment to those who came from distant parts. In the afternoon the Rector administered the Rite of Holy Baptism.

At a meeting of the executive and members of the local G.W.V.A. held at the News office on Tuesday evening, it was decided to hold a public memorial service at Recreation Hall on Sunday afternoon, November 11th, Armistice Day, at three o'clock.

A special speaker will be secured, who will be assisted by the local clergy. A program committee consisting of Cdes. Anderson, Bainbridge, Main and Thunell will attend to details. It is expected that the hall will be filled with ex-service men, friends, relatives and the public in general on this occasion.

A committee consisting of Cdes. Clinton, Kealey, Dr. Little, Small and McLehlan to arrange for a Smoker to be held in the Elks hall for returned men on Friday, November 10th.

It was decided to dispense with the usual banquet this year. Mr. and Mrs. A. Vallie, Mr. U. Gravel and sons; from Edmonton; also Miss L. Jacques and Miss Lambert from Los Angeles, California, motored up from Edmonton to spend the week end with Mr. and Mrs. Tom Mercier. While here they visited the gas wells, also the Buffalo Park at Wainwright. Mr. Gravel and sons intend to take up farming in the Viking district.

Dr. and Mrs. J. Baile of Edmonton, motored down from Edmonton and were guests at the home of Mr. and Mrs. W. McAthey. While here Dr. Baile enjoyed a duck hunt with the genial "Mac" whose prowess with the gun is only equalled by his long hikes, taken before breakfast, winter and summer.

Mrs. S. Barrow accompanied by her sister Miss Marjorie Bishop of Chelmsford, passed through here on Friday last on their way to Detroit, Michigan.

Mrs. J. Alexander was at Didsbury last week as delegate from the Viking Local to the W.C.T.U. convention held there.

Born, to Mr. and Mrs. L. Scott, on October 4th, at the Royal Alexandra hospital, Edmonton, a daughter—Tofield Mercury.

A prairie fire burned the grass on a considerable stretch of country six miles west of town last Friday evening but no damage is reported.

Lord Bickenhead has resigned from the British cabinet to go into the newspaper game with the idea of making more money. What a hope! There's many an "Alberta" publisher who would gladly step into his shoes at the going wages of a cabinet minister.

Household Hints

Every winter, I do up several dozen jars of meat—beef, pork and chicken—and find it such a change from salt pork & eggs, which many farmers depend on.

ROAST MEAT—Roast your meat same as for table, making lots of nice brown gravy. Do not thicken. Slice in half inch slices, and pack in jar. Fill in jar to within half inch of top with gravy or stock; add one teaspoon salt; adjust rubber; one clamp only, and boil three hours. Adjust second clamp and let cool in place free from draught. You can also boil the meat and can in same way. Sometimes I slice and fry meat as for table, then can these slices with their nice brown gravy.

In canning chicken, I usually roast it one day and can it the next, as it cuts better when cold. I do not put any bones except the wings, in the bottle, but when I have canned all the large pieces of meat, I run all the small pieces, also heart and liver, through the meat cutter, season with summer savory; add stock or water and bottle, and boil for three hours. This is lovely in meat cakes, etc. With the bones also feed, and the neck, I make a good stock, which I use canned for soups.

In canning pork, be sure to have quite a piece of the fat in each jar.

Now, a few words as to the equipment needed. If any of you have no wash boiler, get one; also a canning rack to sit in the boiler. I have both, and use them three times a day for 365 days each year—not for canning only—but just read further on.

Be sure and wash your bottles clean with good soap and water, and rinse with soda water. See that your rubber rings are fresh, not brittle, and make sure that your bottles do not leak. Test them the day before by filling them with colored water and by inverting them on clean paper or cloth. You can then discover the leak promptly if there be one. By doing this, I cannot see where you will fail in canning. In boiling, fill boiler to neck of bottles with just warm water; put on boiler cover. Do not begin to count the three hours till water begins to boil. Keep water to that level while boiling water from kettle.

I use the wash boiler and rack as a dish drier, and oh, the joy of not having to dry dishes, especially at threshing and hay-baling times; and the joy when the washing day comes around of not having six or eight dish towels to wash. Just wash your dishes, pile them in the rack, cups inverted first, place in boiler, pour over all about half a gallon of water and set on stove. While they are steaming, under a cover or newspaper, if extra full, for 15 minutes, the pans, etc., can be disposed of. If the rack is not too full I lift it out on the table to dry off, but if it is too full, I lift the boiler and all off, take off covering and let dry at will. This has taken all the drudgery out of dish washing for me.

And now one more hint to Mrs. Newlywed, or Stranger: I am using eggs for cooking at present which I put away last July 4th, over six months ago, and they are as good as ever, and this is how I did it: Gather only fresh, clean eggs, if infertile, all the better; the next day after heat has gone out of them, dip each one separately in boiling brine (strong salt and water) while you count ten. Lay them aside to dry off and cool, and wrap each one separately in a square of newspaper. Pack in cardboard boxes, about two dozen to a box, and during the summer turn the boxes side ways or invert, whenever you happen to be near them—"Molly-O."

The Wastebasket

Heard among the girls at the post-office lobby: "She told me you told her that secret I told you not to tell her." "The mean thing! I told her not to tell you I told her." "I promised her I wouldn't tell you she told me, so don't tell her I did."

Heard at the ladies' social: "She admits that she is terribly disappointed in her husband." "How is that?" "Why, she married him to reform him, and now she finds that he doesn't need it."

"I wrote to the agricultural department to find out how long cows should be milked," remarked one farmer to another here Saturday. "And what answer did you get?" the other inquired. "They said they should be milked just like short cows," he replied.

Here is the way one local man fixed it up with his wife. "How could you forget that this is my birthday?" she asked. "Well, you see, my dear," he replied, "it is probably because you don't look a year older."

"How long has your hired man been working for you?" a farmer was asked on the street here last week. "About two hours," the farmer replied. "Why I thought he had been with you longer than that?" his questioner said. "He has. He's been with us two months," the farmer replied.

"I am afraid, doctor," said a woman to her physician, "that my husband has some terrible mental affliction. Sometimes I talk to him for hours, and then discover that he literally hasn't heard a word I said." "That isn't an affliction," was the reply, "that's a divine gift."

THE SWEDS' RESOLUTION

Ay tank Ay vill co-operate
Und help my neighbor out.
Ay can't get anyone alone;
Dat's so without a doubt.
He needs my help. Ay-need his too.
Ve pull just like a team.
Ven he kvits fighting vid me
And Ay kvits fighting heem.
Ve neighbors act just like big fools
Ven ve each odder fight.
Und say each odder ven is wrong
Ven neider von is right.

RADIO MOVIES SUCCESSFUL

A short time ago a small group of radio's most conspicuous leaders met to view the reception of the world's first radio-movies. The demonstration was a complete success, the movies being broadcasted from the Westinghouse station KDKA and reproduced on a ground glass screen before the scientists, clearly enough to permit the reading of the sub-titles. It was conceded by all present that within a short time the radio listener will be able to sit in his home and have that popular form of entertainment—motion pictures, projected by his own individual receiver.

The Westinghouse Company, pioneers in radio, alternating currents and innumerable other electrical developments, is taking the lead in this new field. It is scarcely half a year since the idea came to Dr. Conrad of the Westinghouse engineering staff, yet within this short time developments have been so rapid that today the Westinghouse Company have definitely decided to broadcast pictures from KDKA in the near future and anticipate putting these receiving machines on the market to be sold by Westinghouse Dealers.

FOR THE SKIN!

WORLD HAPPENINGS BRIEFLY TOLD

Old Age Pension legislation for Ontario is not likely to be enacted next year, but will be one of the government's main planks in its coming election campaign.

Baron Von Huenfeld, German flier who stopped over at Constantinople on his flight from Germany to San Francisco, revealed that Germany is planning an air line to China.

A fitting ceremony marked the unveiling of a granite cross at Ile Aux Coudres, Quebec, commemorating the first mass ever said in Canada by Jacques Cartier, on September 6, 1535.

General Umberto Nobile has announced he would go into seclusion at the home of a friend in Naples soon to write the complete story of his recent Polar expedition.

An all-Canadian telephone service, Winnipeg to Montreal, has been established via Port Arthur and Fort William, a distance of 1,600 miles. Hereafter, a connection between these points has been made through the United States.

The Department of National Defence, Ottawa, has placed an order with the British firm of Armstrong-Whitworth for five Blenheim fighting planes to cost \$130,000. This will bring the government's fighting planes to thirteen.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dunas, Que., writes: "I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by most medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Automatic Gear Shifting

New Device Developed In England To Solve Motor Troubles

The London Daily Mail says that a "motoring development of first rate importance" in the form of an automatic gear-shifting device has been adopted by one of the leading British manufacturers after successful tests over 50,000 miles.

By this device a driver moves a pointer on a quadrant on his steering wheel to the desired speed designation, steps on a pedal, and the gear changes automatically, smoothly and silently."

"Well, Polly, how do you like your new teacher?"

"I half-like her and I half don't like her. But I think I half don't like her."

"HELPED ME WONDERFULLY"

Woman Strengthened by
Taking Lydia E.
Pinkham's Vegetable
Compound

Port Colborne, Ont. "After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe me, it helped me wonderfully. I have no weak spots any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicine have helped me wonderfully."

WILL FILL IMPORTANT ROLE

Britain's First High Commissioner To Canada Should Be Helpful To Both Governments

Sir William Clark, who has arrived in Canada to serve as Britain's first High Commissioner to this country, will fill a very important role and one that gives promise of being valuable to both countries concerned. As Sir William himself has declared, he will serve as an additional channel of communication between the Ottawa and London governments, "two governments," he adds, "serving equally the same king and governing nations within one and the same Empire."

Britain's High Commissioner to this country should be able to offer important advice to the British Government on a number of matters that will inevitably arise. There is, for instance, the question of immigration. The question of British immigration into this country is perhaps the most important one so far as the two governments are concerned. The new British High Commissioner, who is a trained observer of all economic questions, should be helpful in solving this difficulty. He will be in a position to advise the British Government as to Canada's powers of absorption, as to just what type of immigrant this country requires: indeed he should be in a position to advise with accuracy, and with a full knowledge of all aspects of the situation, both the British and Canadian Governments on this important question. In fact, it is just possible that this new link between the two countries which has been created is just what is necessary to render a problem no longer a problem.

On other matters, too, Britain's High Commissioner to Canada should be of distinct service. Sir William Clark gives promise of being an ideal man for the post and Canada will welcome him heartily to her shores.

An Interesting Collection

Figureheads of Old Warships Can Be Seen In England

At Castle's Yard, Millbank, England, is preserved the most complete collection of figureheads of old warships, some of them dating back to Nelson's time—exactly in England today.

Here may be seen figureheads from the Hood, Creasy, Bristol, Collingwood, and many other famous ships, carved out of timber and painted and gilded by men who were artists in their craft.

One very fine example is the Highlander that once belonged to H.M.S. Edinburgh. Another is a gigantic head of the Duke of Wellington, measuring nearly four feet from forehead to chin. The ship which this adorned was launched on the day the Iron Duke died. Another interesting exhibit came from the Fighting Temeraire, Turner's famous picture of which hangs in the Tate Gallery near by.

NEW BEAUTY By Mac Martin

You can look attractive and stylish on less. Learn how to give new beauty and variety to your dress and add individuality and charm to things around the home by the quick magic of tinting and dyeing. Perfect results are possible only with Diamond Dyes. Each package represents the perfection of 50 years of dye-making. They never streak spot or run. They are real dyes like those used when the cloth was made. Diamond dyes are easy to use. The "know-how" in the dyes. British Columbia Apples

Will Be Marketed In New Way From Coast To Coast

British Columbia apples are now going to be marketed in an up-to-date way from coast to coast in all the larger cities of Canada, it is announced by W. McL. Cooper, general manager of the Eden Apple Service, a subsidiary of the Associated Growers of the Okanagan, following meetings with Victoria and Vancouver wholesalers. Under the new plan British Columbia apple service stations will be established in all the chief cities where apples will be kept cool and in best condition. British Columbia apples will be distributed from these stations in a new style, half dozen and dozen cartons for the small buyer. All selling will be done through retailers, who will be supplied daily.

Seed Cleaning Station

New Government Station At Saskatoon To Be Ready For 1929 Crop

Dr. J. H. Grisdale, Deputy Minister of Agriculture at Ottawa, following a visit to Saskatoon, stated that it was the intention of the Federal Government to establish shortly at the latter city a seed cleaning station, similar to that operated at Moose Jaw, and that he hoped the new station would be operating in time for the farmers to take advantage of it for the 1929 crops.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Our National Buffalo Herd

Buffalo National Park, with its area of 197.5 square miles, is the home of Canada's national buffalo herd, there being a little over 5,000 of these animals now in the park. Moose, elk, mule deer antelope and yak are also in the park.

Among the arms, munitions, etc., which Germany has either handed over to the Allies or destroyed are 14,000 aeroplanes, 315 submarines, 82 torpedo boats, 8,000 rifles and small arms and 107,000 machine guns.

Blentail Lignite Coal

Approximately half a million tons of coal were produced from the Blentail lignite coal fields last year, and it is expected that a similar amount will be dug during the coming winter months.

First Film Actress "Aren't you satisfied with one husband?" Second—"Yes—but unfortunately he's not mine."

Oil is obtained from coal in a plant now in operation in Germany.

The Peace River

Success Being Achieved In All Branches Of Agriculture

The eyes of agriculturists are now turning to the Peace River country, where the winter appear to be comparatively mild, and where wheat, oats, and timothy seed can be grown and take prizes in world competition. In this wonderful stretch of country often by the middle of April the winter grains and grasses are greening and the first wheat in May sees the tulips and hyacinths in full bloom. Summer temperatures range around 60, and though early frosts are at times experienced, harvesting is usually well in hand by the first week in September. Some splendid wheat yields were reported a year ago in the Grande Prairie and Valhalla districts running from 42 to 70 bushels to the acre.

Work done on the Beaverleg Experimental Sub-Station is fully set forth in the report of that station which is available for distribution and may be had on application to the Publications Branch, Department of Agriculture, Ottawa. The Peace River country is developing very rapidly, and the agriculture practiced is very diversified. Success is being achieved in all branches, including grain, dairying, poultry and beekeeping.

Externally or Internally, It Is Good—When Applied Externally by Rubbing. Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will soothe the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

British Harvesters And Red Cross
In War And Peace The Red Cross Is Still Serving

"Ready for service" is the proud boast of the Red Cross the world over, and in countless ways, unseen by the man in the street, the Red Cross is found to be "still serving."

A large party of British harvesters in the west found themselves stranded in the city of Calgary. Their immediate need was shelter for the night and the friendly hand. The Red Cross of Alberta gladly came to the rescue and was able to co-operate with the Salvation Army in the problem of getting the men comfortable for the night, by supplying each and all with warm bed-clothing.

Thus in the unknown byways of the world by little deeds of kindness were these weary travellers reminded that the Red Cross, their friend in war time, was still anxious and ready to be their friend in times of peace.

People seldom improve when they have no model but themselves to copy after.

SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes: "Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and was not without a bottle of it in the house for any thing."

Has been on the market for over 80 years; purchased by Mrs. T. Milburn Co., Limited, Toronto, Ont.

WORK PRACTICALLY FINISHED

Headstones Have Been Provided For Every Grave On Western Front

The headstone for the last grave in the cemetery on the Western Front has been shipped to France by the Imperial War Graves Commission. Since the work was first started by the Commission between 600,000 and 700,000 headstones have been sent to France and Belgium. Most of these have been erected, but a few still remain in the cemeteries awaiting erection. Although headstones have now been provided for every grave on the Western Front, it is possible that more will be required, as bodies are still being found in the battlefields.

All these stones have been quarried in England by ex-Service men and prepared here before being shipped to the Western Front.

Some of the cemeteries have been selected to contain memorials to the missing. All those men who died during the war, and who have no graves, will have their names placed on these memorials. Nine memorials to the missing are in the course of construction at the present time and five have been completed and installed. A memorial to members of the Air Force who were reported missing on the Western Front is being erected in the Flanders d'Amiens, and on it about 25,000 names will be inscribed.

In a statement an official of the Imperial War Graves Commission said that it was hoped that the memorial at La Flesse-Jouarre which will contain 3,888 names, and which commemorates the missing at the retreat of Mons, will be ready for unveiling by the end of October. This memorial will also include the names of those who were missing in the battle of the Marne and the Somme.

Between 11,000 and 12,000 officers and men of the Mercantile Marine who died as the result of enemy action and who have no known graves are to be commemorated on Tower Hill. The design by Sir Edward Lutyens is a great vaulted corridor, in whose three bays the names of the 11,000 are being inscribed.

Recipes For This Week

(By Betty Barclay)

ORANGE CUSTARD (Serves 7)
2 cups Borden's St. Charles Milk
1 cup hot water
8 tablespoons cornstarch
3 eggs
1/2 teaspoon salt
1/2 cupful cold water
1 cup orange juice
2 tablespoons lemon juice
Grated rind of one orange

1 egg
Mix cornstarch, sugar and salt, dilute with cold water. Add to scalded milk and hot water, stirring constantly until mixture thickens, afterwards occasionally; cook fifteen minutes. Add orange juice and slightly beaten eggs that have previously been mixed; mix thoroughly and lastly, add the lemon juice and orange rind. Cool and serve.

CARAMEL CUSTARD (Serves 6)

1 tall can Borden's St. Charles Milk with enough water to make 1 quart.
5 eggs
1/2 teaspoon salt
1/2 teaspoon vanilla
1/2 cup sugar
1/2 teaspoon nutmeg

Gradually sift sugar into a hot skillet, shaking the skillet vigorously all the time to prevent burning. The sugar should melt about as fast as it is sifted into the pan. When it turns to an amber color (a light flesh color) set on back of stove and add milk, being careful that milk does not bubble over, as is liable on account of the high temperature of sugar. As soon as the sugar is melted in the milk, add mixture gradually to eggs slightly beaten. Add the salt and flavoring to egg and milk mixture. Bake in custard cups in a moderate oven.

*To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Will Continue Confederation Train

As a result of the great increase in winter travel between Ontario and the prairie provinces, the "Confederation" train, the Canadian National Railway, passenger and express which now runs between Toronto and Vancouver, linking these cities with Brandon, Regina, Saskatoon and Edmonton will operate as far west as Edmonton until January 5.

Each of the continents has one or more towns bearing the name of Rome.

WHITE STAR LINE CANADIAN SERVICE

Teeth and Health

Insured by The Canadian Dental Hygiene Council and Published By The Saskatchewan Dentist Society

THE TOOTH "NERVE"

You know, of course, that a tooth is not solid right through, but is hollowed out in the centre to form a chamber; and because of sad experience perhaps in a dental chair, you have been made aware that a tooth does possess a "nerve."

But you gave no thought possibly as to whether this chamber contained other things or not.

Now, as a matter of fact, it does, and the so-called "nerve" is known as the pulp, which tissue is a mass of almost gelatinous character containing minute blood vessels and nerve filaments.

So it is not just a glistening string like piece of nerve tissue as you may have supposed.

When the tooth erupts, the pulp chamber is proportionately large, but with the tooth practically fully formed, the need for tissue forming elements is largely past. So the blood supply is cut off more and more with a progressive narrowing of the pulp chamber, until in advanced life, it is sometimes almost obliterated.

This accounts for the fact that tooth decay can move quickly to great havoc in the child's tooth than in the adult's.

You dread the dental engine, and at the first touch of the "drill" to the tooth, you are sure the dentist has struck the nerve because of the pain produced.

However, this sensation is being carried merely by minute fibrils that lie in the dental structure, while the pulp containing the nerve proper has gone undamaged.

Remember this: that the power of feeling in the pulp is very low and once infected, the chances of its recovery to health are extremely slight.

For which reason you should be on your guard to head off tooth disease in its earlier stages.

"What sort of face powder does your mother want, my girl?"

"Anyfink yot will cover up a black eye, sir."

CHAPTER II—Continued.

Fresh from his exercises and shower, his cheeks red, his dark eyes shining with the clear glow of health, his step springy and free, Donald was a picture of rugged health and strength. But for all this apparent outward brightness, inwardly he felt rebellious. Douglas's invitation had brought a great longing for the comforts of his past life. Why should he assume the role of a pugilist to eke out an existence? Why wear shabby clothes and even know the pangs of hunger? He had but to write his father that he was destitute and plenty of money would be forthcoming.

"A big steak at 'Old Joe's' furnished him a hearty meal. As he selected the money from his meagre supply of cash to pay his check, Old Joe bent his grizzled head forward. "Don't go hungry; come in any time."

"Thank you, Joe."

Donald was in a dark mood. He heard the sound of happy laughter coming from a saloon on the corner. There behind those swinging doors was momentary recess from worldly cares. He stood in the door of this restaurant and looked across the Inlet at the twin peaks, known as the "Lions," which guard the entrance to Vancouver's harbor. The sun was setting in a mass of fleecy clouds; the clouds became a luminous gauze, and a golden splendor spread over the water. The mountains were suffused in violet, while the snow-dusted peaks took on a faint stain of rose. Donald's face glowed as he watched.

"Some, country!" he breathed. He turned to catch a friendly smile from Old Joe as he worked over his range. "And some people!" he added fervently.

Once more he turned to the mountains. The glow had vanished and the Lions stood in bold relief against the clear sky. The massive snow-capped peaks seemed to impart a new strength to his being. "I'll not quit. I'm going to make good," he said grimly.

CHAPTER III.

While on his daily run around Stanley Park the next afternoon Donald was attracted by a horse and rider standing on Prospect Point. The rider was interested in a huge white liner plowing her way through the Narrows, bucking a head tide. The horse, a noble animal, with full mane and tail, was restive, rocking and prancing in his eagerness to be off.

When Donald lifted his eyes to the rider he saw a beautiful, haughty face with skin of a milky whiteness, a heavy mass of dark brown hair, neatly coiffed under a trim riding hat, and a pair of wonderful brown eyes that suddenly grew cold.

A shower of dirt and pebbles stung

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She's working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANCE, 44 Lingard Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17-year-old girl."—MRS. ALFRED OUELLETTE, Pinewood, Ontario.

W. N. U. 1754

leave thy woody bower, Sir Don, the goddess awaits thee."

Seething inwardly, Donald tried to appear dignified as he stepped to the door, but the attempt was a dismal failure. How could one approach anything like dignity when dressed in a pair of running trunks, a torn and frayed jersey, socks turned down over a pair of dirty tennis shoes, and without hat or coat? All this added to the fact that he faced a battery of two big brown eyes, who thought him a masquerade. The greatest actor in the world would fail to register dignity under such conditions. He had a confused remembrance of a jumble of words that went for a formal introduction. He felt his face hot, and knew he was blushing furiously, which did not add to his composure.

The girl looked down curiously but not without interest, at the embarrassed young man.

Donald finally mustered courage to glance up at the face above him. The deep brown eyes regarding him held just a trace of humor. The full red lips were parted to show a flash of white, even teeth.

"It is a pleasure to meet you even under such inauspicious circumstances," stammered Donald. He turned to glance at the grinning cause of his discomfort. "I would suggest, Miss Rennie, that you have a doctor waiting at your home, as I intend to commit mayhem on the person of your brother as soon as you have gone."

(To Be Continued.)

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

Recipes For This Week

(By Betty Barclay)

Orange Balls

Soak orange peels three days in cold water changing the water daily; then put in hot water and boil until soft. Drain, wipe dry with cheese-cloth, chop fine, and measure. Take an equal amount of sugar, and for each one-third of a cup of sugar add two tablespoons each of water and butter, and boil until it will spin a thread, then add the chopped peel, boil about five minutes; cool, put on a board, sprinkle with granulated sugar, and shape into small balls. These may be rolled in coarse sugar, and allowed to dry, or they may be dipped in fondant, flavored with vanilla. They are delicious dipped in chocolate with a few grains of orange sprinkled on the top of each chocolate before it hardens.

Tenderloin of Beef Stuffed with Oysters

Large tenderloin.
One pint oysters.
One teaspoon cracker crumbs.
Salt.
Pepper.
Celery salt.
Split the tenderloin. Season with salt and pepper. Make a dressing with the oysters, crackers, and season with salt, pepper, and celery salt. Spread part of the one tenderloin with dressing. Put the other one-half tenderloin on top. Tie together with string and bake. Baste often.

Inspiration From Commonplace Things

Door-Knocker Gave Beethoven Idea for Glorious Concerts

To an ordinary mind it would be scarcely seem possible that much music could be got out of a door-knocker. Yet it was this sound which is said to have inspired Beethoven's glorious violin concerto in D. As the musician lay awake one night shaping the concerto in his mind, his musings were interrupted by a belated neighbor who was endeavoring to arouse his housekeeper and get her to come down and let him in. Beethoven heard his persistent knocking for admission—four slow deliberate knocks at a time. The constant repetition gave the composer the idea he sought and those four knocks are heard all through the opening movement of the concerto, which begins with four unaccompanied D's on the drum—seemingly as unmelodious and unpromising an opening phrase as one could imagine. In commenting upon the circumstances Sir George Grove has said: "those four knocks were to Beethoven what the hulk of the old Temeraire was to Turner, or the dafted to Wordsworth—commonplaces in themselves but transmuted by the fire of genius into an imperishable monument."

A PROBLEM FOR YOUNG MOTHERS

Stomach troubles cause most of the distress of babyhood and childhood, and are the greatest problem that a mother has to solve. The treatment for these digestive disturbances that make baby cry continually and disturb his sleep must be quick and effective, and, above all, perfectly safe.

The absolutely safe treatment for disturbances of the stomach and bowels is found in Baby's Own Tablets. Thousands of mothers have had their problem solved through them. They are guaranteed to be free from all injurious drugs and cannot possibly do harm to even the youngest babe—they always do good. Baby's Own Tablets regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fevers and promote that health-giving sleep which is so necessary to the welfare of the baby or growing child. The Tablets are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Romans Understood Method of Soldering

Sample of Work on Iron Ferrule Discovered in Ancient City

A method of soldering two pieces of iron together with copper was known to Roman artisans in England nearly two thousand years ago. This is shown by a deep iron ferrule like a modern servitor ring unearthed during excavations of the Roman city of Uricum, located in the river Severn and destroyed about A.D. 400.

Lead pipe manufactured and laid in Rome's water system 1,800 years ago was recently pronounced to be in perfect condition.

Great Lakes "Gambling" Season

The "gambling" season of the Great Lakes is near at hand. Stakes that mount to millions and involve the lives of men are on the play boards of the shippers who soon will be sending their mighty grain and ore carriers to fetch that last cargo of the season and in doing so they stake their ship and the lives of the men against the elements which only last year claimed five ships and victims and cost the lives of 24 men and two women.

Dietitian: "Yes, a few lettuce leaves without oil, and a glass of orange juice. There, madam, that completes your daily diet."

Mrs. Overweight: "Thank you so much, Doctor, but do I take this before or after meals?"

First Bachelor: "Is there anything in this affair of yours with the heiress?"

Second Same: "Millions, I hope."

TOOTH TURNS BLACK

Your tooth pearls teeth have perhaps excited the admiration of your friends and your pride in them is fairly pardonable.

But one day a tooth that you had been intending to have "fixed" ceased to bother you until by and by you noted with some little alarm that this tooth was quite dark in contrast to its fellows.

Or, perhaps, your dentist because of your neglect found it necessary to remove the pulp from a tooth, following which operation you found some dismay that it had changed color, and noticeably so.

Now, what has caused it? Contrary to your idea, possibly, a tooth gets its shade, not from the outer enamel covering, which is almost colorless, but from the array of colors in the underlying body of dentine.

As a sequence to pulp death and decomposition, we have a disintegration of the blood elements with the production of pigments or color compounds. These permeate the dentinal structure through its many little tubuli and are reflected through the almost transparent enamel, giving the tooth its shade; this is the principal cause of discoloration.

A less frequent cause is from the use of remedial agents employed in tooth treatments, many of which have the property of staining the dental substance.

Now, unfortunately, as you can see, all of the securing that you may do is of no avail—like the historic spot of "Mabel"—it will not "wash." However, your dentist by employing bleaching agents within the tooth cavity can with fair success restore the shade, if the discoloration has not remained too long.

Tourists Aid Development

The tourist is often the forerunner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

Scott's Emulsion

is the easy and pleasant way to exact the most out of cod-liver oil to reinforce your body with strength to build resistance.

EVEREADY Radio Batteries

—they last longer

Try It Yourself, Too!
You Can See Why a Layerbilt Lasts Longer

We would hardly advise you to tear up a new Eveready Layerbilt to find out why it lasts longer—but after you have finished one of these batteries, pull it apart!

You'll see how solid with current-making elements it was—and how evenly the wide plates of carbon and zinc were away, giving the last bit of energy before your Layerbilt finally "signed off."

You'll marvel at the great improvement over the old types of batteries with their round cell construction—and we know that you'll be satisfied that the low life and economy of your Layerbilt was not just a lucky accident or a mystery, but a certainty of long service and economy based on scientific construction, which you can count upon with every Eveready Layerbilt "B" Battery.
